

IntrinsiQ Research

404 Wyman Street Suite 100
Waltham, MA 02451
August 2, 2006

Dear VAHOM Member:

As a member of VAHOM, IntrinsiQ Research would like to make you aware of an important opportunity the VAHOM Board of Directors has negotiated for your practice. The board has structured a special VAHOM/IntelliDose software purchase plan with significant discounts and rebates to its membership.

IntelliDose is the most widely used Oncology software solution across the country among medical oncology practices of all sizes. IntelliDose will automate all of the processes involved in the care of your patients. It is designed to make your practice more economically efficient and most importantly, increase safety.

We invite you to see the software for yourself by attending one of our online software demonstrations. Please call or email me to receive the demonstration schedule.

We will be contacting you over the coming days to discuss this program. In the mean time, we invite you to contact us with any questions you may have as well as scheduling a short online demo.

Sincerely,

Kris Beinder
Director, Inside Sales
